Introducing the ECO Canterbury Environmental Activities Calendar

Spread the News

The ECO Canterbury Environmental Network has been formed to bring Canterbury environment conservation and sustainability groups together for mutual support and information sharing. We are building our network from Christchurch out across the region. Spread the word to community groups who can join us to make this even better*.

The need for a [calendar](#), one place where we can register our events and look for those of others, and avoid double-booking, has been identified as important and our first collaborative project.

If you are not already a member and you are a community organisation working for the environment and conservation, join the Network to have automatic access to the [calendar](#). Our administrator (info@ecocanterbury.org.nz) will also put up dates of general interest like Conservation Week and Arbour Day, and non-community groups can apply to have their activities on the calendar.

**The ECO Canterbury Environmental Network is an initiative of local members of Environment and Conservation Organisations of New Zealand (ECO), and open to all like-minded not-for-profit, non-government, non-party political Canterbury organisations committed wholly or partly to work in various aspects of environment and conservation. Join Us!*
